SCHOOL APP

Asman's School App is a innovative and first of a kind application suite which intends to build a robust communication platform for the schools and the students. The School App eliminates the use of multiple mediums like Diary, SMS, notice board, circulars, websites, with which a school communicates with the parent about the child.

Features:

1. Syllabus in your mobile
2. Event Management (Special Days, Field Trips, Parents Meetings, Examination Schedules, Anniversaries, Opinion Polls etc)
3. Notification Alerts
4. Weekend/Holiday Assignments
5. Fee Management
6. Attendance Management
7. Canteen Menu
8. Reports
9. Feedback from Parents
10. Time Tables
11. Special Instructions for Kids
12. Grade Results

Benefits:

1. Eliminates the usage of different medium of communication.
2. Efficient and fool proof communication platform.
3. Eliminates SMS and removes SMS subscription overhead.
4. Reduces cost on event management.
5. Saves time and effort for the teachers, admin and school management.
6. Reduces paper and printing costs.
7. Makes the school to go GREEN by saving lots of trees (paper).

iPhone, iPad.   Phone, Tablet.   Phone.

Asman's School App is collection of 4 Modules which provides a platform for seamless communication between school management and the parents.

Parent Module:

A parent on behalf of student can access the application through their mobile. They can view the syllabus, follow the events, view messages and access the home work created by the teacher.

Teacher Module:

A teacher can access application either through the web browser or through a mobile. She can access information about the classes she is responsible for and can create events, create home works for students and can send messages or special instructions.

Admin Module:

An Admin who is a representative of the school can access the application through a web browser. He can manage locations, add teachers, students, send messages and organize events.

Principal Module:

Principal can access the application through the mobile. He can view the events or messages created by admin or the teacher. He validates the events and messages and either approves or rejects those events/messages.
